Architect/Designer:	-
Contractor:	Van Nieuwland Hoveniers

“Academic Medical Centre”

The academic hospital of Leiden has a special quarantine ward. The patients on this ward can't leave their room and in the past they could only see the grey gravel roof outside their window. The hospital decided to give them a better view with plants and butterflies. They asked Van Nieuwland Hoveniers together with ZinCo Benelux to make a nice green roof to look out on. This resulted in a very attractive green roof with sedum, ferns and olive trees.

ZinCo Benelux is a supplier and adviser of ZinCo Green Roof Systems in Belgium, Luxembourg and the Netherlands. The ZinCo Green Roof Systems provide clients with complete system build-ups for every type of Green Roof. The product range includes: extensive Green Roofs with rockery type plants, flourishing roof gardens as well as Green Roofs in combination with walkways and driveways.
