### “Jan de Louterhof”

The city of Amsterdam is renewing the post-war neighbourhoods. The complex “Jan de Louterhof” is a good example of a project with very different functions: working, living and parking are combined in one building. The lack of open space forces the principal to use the entire plot to build on.

On the green roof the residents have their own private terrace and a shared terrace with a semi-intensive garden.

*ZinCo Benelux is a supplier and adviser of ZinCo Green Roof Systems in Belgium, Luxembourg and the Netherlands. The ZinCo Green Roof Systems provide clients with complete system*

*build-ups for every type of Green Roof. The product range includes: extensive Green Roofs with rockery type plants, flourishing roof gardens as well as Green Roofs in combination with walkways and driveways.*
